## Survey

A survey is often used in a research project to collect feedback from users of a system or participants of an event. Results of the evaluation will be of interest to the researcher(s) to help them determine whether the approach is likely to affect the objectives set in the research.

## Voluntary Participation

Participation in surveys is voluntary. You may discontinue participation at any time during the research activity and, on request, will delete data collected from you (until publication, at which point deletion is no longer possible).

Census and Survey Processing System (CSPro) is a public domain statistical package developed by the U.S. Census Bureau and ICF International.  
Epi Info is public domain statistical software for epidemiology developed by Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia, U.S.A.

### Take Survey Page

## Unit Delivery Survey

You are invited to participate in a research trial as part of the teaching and learning research by Qiang (Nathan) He in the Faculty of Science, Engineering and Technology of Swinburne University of Technology.

### The Research Project

This study aims to collect feedback from students undertaking up Web Development. This is in order to evaluate the delivery of the unit. Results of the evaluation will be of interest to the lecturers to help them determine whether our approach is likely to enhance the learning outcomes of the students.

### Voluntary Participation

Your participation in this research is voluntary. You may discontinue participation at any time during the research activity and, on request, will delete data collected from you (until publication, at which point deletion is no longer possible).
